

AIS Presents

KribKeeper

For Large Workplace Items

Reduce Operating Costs By Increasing Workplace Efficiency

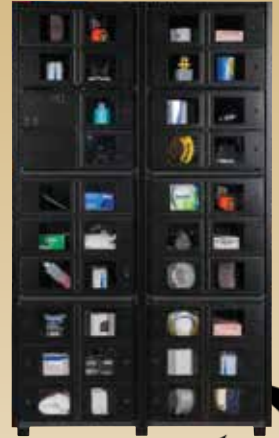

AIS' KribKeeper provides a greater capacity for the larger items included in the secure control of workplace inventory; items like safety supplies, special tools, instruments and more can now be kept under your company's control. These larger items can now be kept safe, secured, and their use is fully accounted for. The reverse side of the KribKeeper is a mirrored image of the front — thus doubling its capacity.
