Reports and Features

Reports

No matter how many Keepers you employ, you'll be able to receive reports on use and inventory by item, by employee, by machine, by department and more.

Features

- Vendor Managed Inventory (VMI)
- Automatic Inventory Replacement
- No monthly service fee
- No Contract
- Security for high-value items
- Tracking by various categories
- Mobile - put it where you need it
- Universally Acceptable

You tell us which tools or supplies you are intending to keep secure and we'll take it from there. You design your Keeper and you control your Keeper!

Call us today and let's start designing your Keeper Care System.

				Total:	\$55.57
				Grand Total:	\$55.57

The KribKeeper™

The **KribKeeper** is for managing inventory of larger tools and supplies: It's a great **Keeper** helpmate in aerospace, industrial, commercial, cutting tool industries, MRO products, electrical, medical, educational and janitorial operations. It's sturdy modular construction means it can stand the day-to-day use of heavy items being tossed in and taken out. The **KribKeeper** can be set up as a stand-alone unit or connected to an existing **Keeper**.

Each item is managed and tracked, and if there are missing items or if an item is checked out for a

prolonged period, the Keeper Care Software tracks and reports what has not been returned, for how long, and who is accountable.

A variety of see-through door sizes offer 15"-deep compartments which are either 6" x 6" (shown), 12" x 6," or 12" x 12."

The **KribKeeper** is available in both 72" and 76" tall models.

At the end of the day you'll be secure in the knowledge.
